

# JOHN B. GARNER, P.E.

## Vice President, Engineering

### **EDUCATIONAL BACKGROUND**

Bachelors of Science - Mechanical Engineering  
Texas A&M University, College Station, Texas  
1980

State of Texas Registered Professional Engineer  
Serial Number 64148

Member of the Society of Petroleum Engineers,  
American Petroleum Institute, IADC, AADE

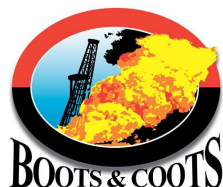

### **RELEVANT WORK EXPERIENCE**

2006-Present	Vice President, Engineering Boots & Coots/International Well Control - Houston, Texas
1999-2006	Sr. Well Control Engineer Boots & Coots/International Well Control - Houston, Texas
1996-1999	Vice President Operations Avanti Consulting – USA, Russia, Mexico, Poland
1991-1996	Drilling Engineer Avanti Turnkey – Gulf Coast Land and Offshore
1987-1991	Drilling Supervisor Avanti Turnkey – Gulf Coast Land and Offshore
1982-1987	District Drilling Engineer Westland Oil Development Corp., Houston, Texas
1980-1982	Field Engineer Otis Engineering, Elk City, Oklahoma
1978-1979	Roughneck, offshore Gulf of Mexico Loffland Brothers Drilling Co., Rig #76

### **HIGHLIGHTS OF WELL CONTROL EXPERIENCE**

2006	Green Canyon Block 82. Noble semi-submersible rig Lorris Bouzigard. Well Control Engineer on a deepwater shallow gas blowout in 2400' of water.
2005	Garden Banks Block 244. Noble semi-submersible rig Lorris Bouzigard. Well Control Engineer on a deepwater pressure control job operating in approximately 2100' of water.  Brooks, Alberta, Canada. Well Control Engineer on surface blowout and fire.
2003	Los Angeles, California. Well Control Engineer on oil well blowout within the metropolis. Provided engineering and well control services during blowout response and dynamic kill operation.  South Ramallah, Iraq. Operations Engineer on oil well fires during Operation Iraqi Freedom. Provided engineering and firefighting services during control of oil fires and well kill operations as a result of damage during armed hostilities.

- 2002 Crossville, Tennessee. Incident Commander on oil well blowout and fire which was federalized under the jurisdiction of the US EPA. Provided engineering support for oil well firefighting/well control operations and supervised all third party suppliers of emergency response contract services.
- Vermillion Parish, Louisiana. Well Control Engineer on pressure control job involving kick off bottom during trip. Bullhead mud to control pressures, strip drill pipe to bottom and performed dynamic kill operation.
- 2001 Mustang Island A-31, Offshore Texas. Well Control Engineer on pressure control job involving kick off bottom during trip. Performed lubricate and bleed to control pressures, strip drill pipe to bottom and dynamic kill operation.
- Rapides Parish, Louisiana. Well Control Engineer on surface blowout of dual lateral Austin Chalk well. Assisted in capping and supervised subsurface intervention, snubbing and dynamic kill operation.
- Matagorda County, Texas. Well Control Engineer on surface blowout of HTHP well resulting from gas flow after cementing. Assisted in capping and supervised subsurface intervention including repair of casing damage, redrill to blowout depth and drilling to objective horizon.
- 2000 Calcasieu Parish, Louisiana. Well Control Engineer on surface blowout resulting from broached underground flow caused from a tubing hanger leak. Assisted in capping and supervised subsurface intervention and snubbing operations.
- Hardin County, Texas. Well Control Engineer responsible for control and restoration of underground blowout of drilling well penetrating geopressure with only surface casing set.
- Hassi Messaoud, Algeria. Well Control Engineer responsible to evaluate and develop work program for underground blowout of gas from Lias formation with flow into the Albian aquifer. Performed analysis and prepared work program to kill well.
- 1999 Jefferson County, Texas. Operations Engineer responsible for control and restoration of underground blowout. Supervised subsurface intervention, snubbing operations and killing well.
- Acadia Parish, La. Operations Engineer responsible for Underground Blowout of drilling well penetrating geopressure with only surface casing set.
